

Connect to the world from Florida

As the birth place of the PC and one of the most connected states in the U.S., Florida's past and future are deeply connected to the IT industry. In fact, **Florida is currently home to more than 36,300 high tech companies and the 595,000+ people they employ.**

Did you know?

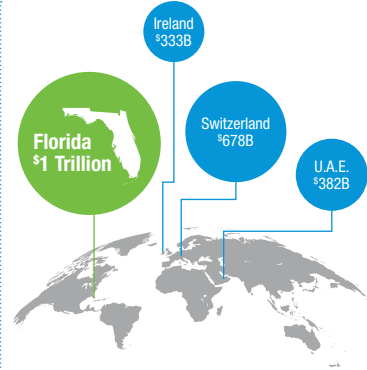

Florida companies benefit from the state's tremendous business advantages – a top talent base, huge market, expansive infrastructure, connections to Latin America, and much more
